Memorandum Circular
No. 8
Series of 2003

Guidelines for the Phytosanitary Inspection of Regulated Articles for Food, Feed and Processing, Pursuant to AO No. 8 (Series of 2002), "Rules and Regulations on the Importation and Release into the Environment of Plants and Plant Products Derived from the Use of Modern Biotechnology"

This Circular covers the issuances of permits, on or after July 1, 2003, for the importation of plants and plant products derived from the use of modern biotechnology and which are intended for direct use as food or feed, or for processing. Importations covered by permits issued before July 1, 2003 are not covered by this Circular and shall be subject only to the conditions laid down at the time of their issuance.

I. Approval Registry

1. No plant or plant product intended for direct use as food, feed, or for processing, shall be allowed entry into the country unless it has undergone the approval process, mandated by the Department of Agriculture Administrative Order No. 8, s. 2002.
2. Plant and plant products of GM origin intended for direct use as food, feed, or processing must carry a certificate of GMO content issued by an authorized body from the country of origin or by an accredited laboratory. A copy of the certificate of GMO content shall be submitted to the BPI within 15 days from arrival of the shipment and shall serve as part of the notification as required under Section 12H of AO No. 8.
3. Plants and plant products intended for direct use as food or feed, or for processing with transformation events listed in the Approval Registry of the Bureau of Plant Industry (BPI), a copy of which will be issued by July 1, 2003 and which forms Annex I of this Memorandum Circular, shall be accompanied only by an import permit and/or phytosanitary permit, to be allowed entry

III. Checks For GMO Content

The Bureau of Plant Industry and the Bureau of Animal Industry shall randomly check importations of plant products as to their GM content particularly for commodities known to be genetically modified and commercially grown in other countries.

Two checks may be done, namely:

1. a screening test which will determine the presence or absence of GMOs; and
2. an ID test which will identify the present GMO transformation events.

This Memorandum Circular takes effect immediately and repeals or amends all other issuances inconsistent hereof.
